Custom Sneeze Guards

The full Counter Sneeze Guards 750mm x 800mm with two 6mm post stands, comes in a kit to complete the DIY installation. The kit comes flat packed to make it easy and safe to ship. You will get step by step instructions on installation. Industrial double-sided tape as an option to hold the sneeze screen to the counter and we have also included cleaning instructions and a micro fibre cloth. This is really the perfect acrylic screen to use on a reception desk or to be used to divide customer counters.

We have sold the screens to pharmacies, doctor surgeries, government offices, accountants, hamburger shops, take away food order outlets, clothing and beauty shops along many other businesses. We have found this design to be also suitable to use for schools' reception counter screens. If you own a nail salon and are looking for purpose made screens to fit Dremel, UV lamps etc to fit under the barrier.

What makes this screen so much better is the construction? We use 6mm clear acrylic for the stands and base. Using the thick acrylic stands gives the screen a much stronger and sturdy free-standing performance. The screen itself is made from 3mm acrylic.
